

Name: _____

Go to <http://science.discovery.com/interactives/literacy/darwin/darwin.html>

Click on Learn About Natural Selection and Darwin's Bio and read the information. After reading these sections answer the following questions.

- 1) What happens when you breed the birds? What trait comes from each?

- 2) When is an organism more likely to attract a mate?

- 3) What does every species exhibit?

- 4) Natural selection is only one way that species change over time, what other ways can cause species to change?

Play the survival game five time and answer the following questions at the same time. Fill in the table with what animals/mutations you chose.

	Original 3 Animals	Life Saver 1	Life Saver 2	How long did you survive?
1				
2				
3				
4				
5				

GT Biology

1) Describe how you picked your first animals for each time you played the game.

2) Describe how you chose which mutations to use. What occurred in **each** scenario?
